**Problem: Psychosocial****Goal:** Provide Support & Promote Coping**Intervention:** Demonstrate a calm demeanor & honest interaction

11:56

SW received phone call from Arzelia Smith, CPS supervisor stating that she spoke with her legal team and they are now saying that CPS cannot serve mother with emergency removal paperwork because pt would not be in imminent harm if returned to mother today and mother has cooperated with the therapeutic separation. SW stressed to CPS supervisor that if pt is allowed to go back to her mother then mother has the funds to flee from the Houston area with the funds that have been donated to mother through Go Fund Me. Mother could find another medical provider that would again put pt on the medications that she does not require and/or the medical equipment that she does not require, which has been demonstrated by the therapeutic separation.

CPS supervisor stated she understood, but she their legal team is saying it isn't enough. CPS will continue to file legal paperwork for a removal, it just will not be emergent. CPS supervisor stated that she will file the paperwork tomorrow.

12:08

SW staffed with CPT team and medical PHM. Pt is in imminent harm if returned to mother's care and she has been a victim of medical abuse. PHM Dr. Lye charted a note stating the harm pt would be in if returned to her mother.

13:12

SW provided the note to CPS supervisor Arzelia Smith, who provided to her legal team. Ms. Smith has stated again that pt's mother will be served with emergency removal paperwork, mother cannot visit or have any contact with pt.

13:20

SW received phone call from Complex Care Clinic. Pt's home health equipment orders were discontinued by Dr. Louis. It was reported to the CCC from the home health company has been in contact with mother so they can pick up the equipment, mother has refused stated the pt will still need the equipment when she comes home. The equipment is oxygen, pulse ox, and bipap.

SW has updated security, PHM, charge nurse, pt's father and BS nurse. Mother cannot have contact with pt.

SW will continue to follow.
